

# CSV, JSON and XML (Oh My!)

Jeff Hicks

PowerShell Person

<https://github.com/jdhitsolutions/psdatafiles>

# What is this all about?

- Exploring different data format options
- When to use which format
- What things to watch out for
- We (you) are not creating functions that result in a specific data format\*
  - But you might in a control script
- How you might incorporate different data structures into your PowerShell tools

# DEMO
